

CS300™ AUTO SPA

Automatic Safety Cover

BY COVERSTAR

SPA/SWIM SPA

The CS300 automatic spa safety cover system provides an attractive and effective solution for spa systems, swim spas and smaller pool applications (up to 200 square feet). The small motor design allows the system to be installed with two-thirds less of an offset than standard systems, yet it still provides powerful torque to efficiently open and close the cover. The CS300 can be utilized in a broad range of spa and swim spa designs including vanishing edges, raised bond beams or freeform systems.

SYSTEM

Innovation. Performance. Reliability.

Flat Lid

Stone/Masonry Lid

The CS300™ automatic safety cover has superior engineering based on more than 35 years of field experience. System reliability and the following high quality components are compelling benefits that make it the preferred choice of spa owners everywhere: *asilly*.

Submersible Motor

The CS300 motor's hardened stainless steel shaft and oil bathed gears virtually eliminate motor problems. It is also sealed against water by the original motor manufacturer.

Durable Mechanism

Heavy-duty, stainless steel components allow the CS300 mechanism to endure harsh environments giving you many years of reliable service.

Guides & Sliders

The heavy duty sliders are the strongest in the industry. A dedicated slide channel prevents binding and stress on the mechanism and increases system reliability.

Ultra Strong Ropes

Rope that is twice as strong as the industry standard.

Exclusive Heat Sealed Webbing

This patented system feature is a substantial improvement over the common webbing attachment method and provides substantially longer webbing life and improved operation of the cover.

Heavy Duty Fabric

The heavy duty vinyl fabric provides optimal ultraviolet, chemical and mildew resistance. Superior fabric strength, tear resistance, and abrasion resistance are enhanced through the extruded coating process and closed polyester weave. *asilly*.

Safety

Children are most at risk when parents believe they are safely inside the house. A cover is considered the number one safety feature you can have on your spa.

Go Green - Save Big Money

Because the CS300 is so easy to use, your spa can be covered when it's not in use. That means you can save up to 70% on heating, 70% on spa chemicals, 50% on electricity, and 90% on water. In fact, your automatic safety cover can completely pay for itself in just a few years. Now, that's green!

Add Heat (Passive Solar) and Reduce Heat Loss (Water evaporation).

A Cleaner Spa - A Happier You

You deserve the soothing and relaxing effects of a spa after a hard day at work, not the hassle of cleaning a dirty spa. With the flip of a switch your spa will be ready to enjoy.

Note: It is intended that people would walk on the pool cover only in case of an emergency.
